

Aqua Reactor

Where is real fuel saving way ?
Hybrid Car is too much expensive.
Electric Car is so early stage.

ECO Solution for the alternative fuel.

- Hydrogen on demand generator.
- No storage Tank for safe on the car.
- HHO(Hydrogen, Hydrogen and oxygen) produce by the Electrolysis of Water.
- No rust with long life time span.

“This is best solution of fuel economy for the existing vehicle over the next 20 years despite the development of electric and other cars.”

A way to spend less fuel on the vehicle.

AQUAREACTOR IS CREATING FUELGAS FOR INTERNAL COMBUSTION ENGINES EXHAUST SYSTEMS, IMPROVES FUEL ECONOMY, 20% TO 75% OR MORE, INCREASES ENGINE POWER AND VEHICLE PERFORMANCE. SAFE, FRESH LOW-PRESSURE HHO(HYDROGEN, HYDROGEN AND OXYGEN) ON DEMAND FROM AQUAREACTOR.

Overview

Water with a little excess vehicle electricity creates Water gas(H₂O Gas, HHO Gas) that cleans carbon from the engine and fractures the FUEL molecules, binds with them creating CLEAN AIR exhaust discharge. 1 Liter of water will yield 1833 Liters of HHO (Hydrogen and Hydrogen Oxygen) Gas. Aquareactor will help save the Planet and reduce Global Warming effects and costing only a few pennies of water. Aquareactor designed to last 7 years or more, very little servicing required, NO MOVING PARTS, only 12-14 or 24-28 Volts of excess electrical power used. The devices are made to fit

New and Existing vehicles, (1960 or earlier to current models) a perfect retrofit product to improve your vehicles, trucks or buses. ***In the harsh light of reality, this is best solution of fuel economy over the next 20 years despite the development of electric and other cars.*** Restores the vehicle's performance, power and improves your fuel economy up to 50% by Titanium plates of Aqua Reactor.

Are you looking for the long life span of HHO generator and no rust one?

Yes, It's Aqua Reactor!

Saving fuel doesn't just save money, it also saves the environment.

Products

KM Series Aquareactor is the ultimate of supply HHO gas on demand for the vehicle.

- Our MMO - Titanium plates are keep clean water, No rust, sludge and Pure Oxyhydrogen Gas produce.
"Chromium ions" in the HHO gas of Stainless Steel act to accelerate the decay of orthohydrogen to parahydrogen. Orthohydrogen is 4x more reactive than parahydrogen. Titanium cells make no chromium ions or other ions. That is why the HHO gas from a Titanium Cell is more reactive.
- Auto circulating design increases efficiency by promoting gas production and cooling.
- Each gap of the plate has a gas-out and a water-in hose.
- No hole plate design for no current leakage and best dry cell of HHO generator.
- Optimized current Amps (5~15A) and Water consumption(10~50ml/hour).
- We warranty our entire system for 5 years or 100,000 miles!

KM-10

The KM-10 Aquareactor for up to 2.5 liters vehicles.

- Best suited for engines up to 1.0 ~ 2.5 liters.
- Makes 0.5 ~ 0.8 liters Oxyhydrogen gas per minute.
- 5 Electrodes are MMO coated Titanium plates.
- A gas-out and A water-in hose from each gap of the plate.
- Dimension: 85 x 180mm(Generator),
90 x 230 mm(Water reservoir)

KM-20

The KM-20 Aquareactor for 2.5 ~ 4 liters vehicles.

- Best suited for engines up to 2.5 ~ 4 liters.
- Makes 0.9 ~ 1.6 liters Oxyhydrogen gas per minute.
- 9 Electrodes are MMO coated Titanium plates.
- A gas-out and A water-in hose from each gap of the plate.
- Dimension: 85 x 180mm(Generator),
90 x 230 mm(Water reservoir)

KM-30

The KM-30 Aquareactor for The bus, truck and heavy vehicles.

- Best suited for engines up to 4 ~ 7 liters.
- Makes 1.6 ~ 2.5 liters Oxyhydrogen gas per minute.
- 21 Electrodes are MMO coated Titanium plates.
- A gas-out and A water-in hose from each gap of the plate
- Dimension: 85 x 180mm(Generator),
90 x 230 mm(Water reservoir)

We are the only company to offer a complete product line that is comprised of high surface coated plates on a pure titanium substrate. This our revolutionary titanium HHO dry cell plate with No hole design requires fewer plates than a comparable stainless steel cell. These plates are unique in many ways. First, they create zero corrosion. No rust entering your engine, No dirty water means no constant maintenance or product tear down. Spend less time monitoring the device, and more time saving money at the pumps! The coating offers a surface area that is over 20 times that of stainless steel. Less metal equates to a design that is smaller and easier to install in the limited space available in modern engine compartments. Our **unique dry cell technology** requires far less refilling than most other systems on the market. And size does matter, especially when trying to install a unit in any late model vehicle.
